📅 Available within 30 days, open to UAE relocation with visa sponsorship

SUMMARY

Senior Frontend Engineer with 6+ years of experience building scalable, high-performance web and mobile applications using React, Next.js, TypeScript, and React Native. Strong background in iGaming, live-streaming, and e-commerce, with hands-on expertise in performance optimization, responsive design, micro-frontend architecture, and clean code within agile teams. Currently building real-time games at Galaxsys (Digitain Group). Open to relocating to UAE with visa sponsorship.

PROFESSIONAL EXPERIENCE

Galaxsys (Digitain Group) 🌐, Senior Frontend Engineer 05/2024 – Present | Yerevan, Armenia

Building real-time iGaming products for international B2B partners.

- Develop high-performance casino and crash-style games using React, Pixi.js, and Matter.js for smooth, responsive gameplay across devices.
- Architect scalable micro-frontend systems with Webpack Module Federation to enable faster, independent deployments.
- Implement real-time game synchronization using WebSocket and Socket.io 🌐 for low-latency multiplayer experiences.
- Manage complex application state with Redux Toolkit (RTK) for clean and predictable game logic.
- Mentor junior developers through code reviews, pair programming, and technical guidance.
- Collaborate with product, design, and backend teams across a 15-person frontend organization.

SoftConstruct 🌐, Senior Software Engineer 02/2022 – 04/2024 | Yerevan, Armenia

Built FastTV — a Netflix-style live-streaming and video-on-demand platform for sports and entertainment, available on web, mobile (iOS/Android), and Smart TV.

- Developed and maintained the FastTV web app using Next.js, TypeScript, and GraphQL, focused on smooth video performance.
- Delivered the FastTV TV application across many Smart TV operating systems, including older and low-resource devices.
- Improved playback on older TVs by optimizing memory, rendering, and resources — making previously unsupported devices fully usable.
- Built responsive cross-platform features for iOS and Android using React Native.
- Applied design patterns (Atomic, Adapter, Observer, Singleton, Strategy) for scalable code.
- Shared performance and clean-architecture practices with mid-level engineers through code reviews.

Logix Software 🌐, Software Engineer 02/2021 – 01/2022 | Yerevan, Armenia

Contributed to scalable B2B web applications (ifta.online 🌐, irregistrationservices.com 🌐) in a fast-paced agile environment.

- Built responsive, high-performance interfaces with React, Next.js, JavaScript (ES6+), Tailwind CSS, and Redux Toolkit (RTK Query).
- Integrated REST APIs with efficient client-side data fetching, caching, and state management.
- Applied SOLID principles and clean architecture for maintainable, scalable codebases.
- Participated in agile ceremonies and code reviews with cross-functional teams.

SKILLS

Languages & Frameworks — JavaScript (ES6+), TypeScript, React, Next.js, React Native, HTML5, CSS3, Sass/SCSS, Tailwind CSS, Responsive Design

State Management & APIs — Redux, Redux Toolkit (RTK), RTK Query, Redux Saga, Context API, REST APIs, GraphQL

Real-Time & Game Development — Canvas API, Pixi.js, Matter.js, WebGL/WebGPU, WebSocket, Socket.io, Video.js

Best Practices — Performance Optimization, Cross-Browser Compatibility, Web Accessibility (WCAG), SEO Optimization, Semantic HTML

Build Tools & Architecture — Webpack, Module Federation, Microfrontend Architecture, Atomic Design, Clean Architecture, Design Patterns, SOLID Principles

Testing & DevOps — Jest, React Testing Library, Storybook, Git, CI/CD, Agile/Scrum

EDUCATION

Picsart Academy , <i>Software Engineering Program</i>	01/2021 – 12/2023 Yerevan, Armenia
Yerevan State University , <i>Bachelor of Science in Radiophysics</i>	09/2018 – 01/2023 Yerevan, Armenia

LANGUAGES

Armenian (Native)

English (Advanced)

Russian (Conversational)
